

Ultra-Gravel Bags®

**Heavy-Duty Bags Provide Quick and Easy
Sediment and Erosion Control**

Gravel bags are a basic BMP (Best Management Practice) used to meet regulatory requirements for stormwater and erosion control. The sizes are industry standard and allow the user to fill them up with as much or as little gravel (not included) as the application requires. Different sizes lend themselves to different applications; from drain protection to erosion control at construction sites.

- Made of very high quality polymer material that is woven into shape - eliminates the flaws and failures of sewn edges.
- High UV rating allows multi-year life in sun and elements.
- Rugged material and construction can, in most instances, withstand being driven-over, a typical problem with lesser bags.

Part#	Description	Size	Color	Quantity	Box Weight
9780	Ultra-Gravel Bag, Individual	19" x 28"	Orange	250 bags / box	60 lbs.
9781	Ultra-Gravel Bag, Roll Form	19" x 250 yards	Orange	1 continuous roll	75 lbs.
9782	Ultra-Gravel Bag, Individual	11" x 48"	Green	250 bags / box	60 lbs.
9783	Ultra-Gravel Bag, Individual	11" x 96"	Green	125 bags / box	60 lbs.
