

Ultra I-Beam Protectors®

Protect I-Beams From Forklifts, Pallet Jacks and Other Equipment

- Modular Design — Use one Protector for each flange of I-beam. Allows installation on beams obstructed by walls or other structures. Four Protector units completely cover I-beam.
- Install multiple units in a “stacked” mode for higher protection from scissor-lifts, raised forklifts and other high-reaching equipment.
- All polyethylene design — no painting or maintenance required for upkeep.

- Specially designed groove allows for quick and easy installation. No straps or fasteners required.

Molded groove simply slides onto I-beam, grips securely.

Modular design allows installation on wall-mounted I-beams and angled columns and supports.

ULTRA-I-BEAM PROTECTORS

Part# 1521
Dimensions: 7 1/2" x 8 1/2" x 42"
Weight: 8 lbs.
Construction: HDPE Polyethylene

Ultra Rack Protectors®

Polyethylene Protectors Prevent Rack System Damage From Pallet Jacks and Other Equipment

- Installs quickly and easily — simply slide onto rack system legs. Pre-drilled holes can be used for permanent installation (hardware not included).
- All-polyethylene construction — eliminates painting and other maintenance.
- Available in 9" and 18" heights — can also be stacked for protection from taller equipment or raised forklift tongs.
- Low profile will not obstruct aisle clearance.

- Safety yellow color provides “visual caution” for drivers and other personnel.

ULTRA-RACK PROTECTORS

Part#	Description	Dimensions
