

Ultra-GutterGuard®

Part # 9320, 9321, 9322

SPECIFICATIONS AND INSTALLATION INSTRUCTIONS

Description:

The GutterGuard® is a synthetic filter manufactured from recycled synthetic fibers. The GutterGuard® is designed to filter stormwater before it enters curb inlets. It is available in various lengths and should be ordered two feet longer than the curb opening. It's the easy, inexpensive Best Management Practice (BMP) for protecting curb inlets during construction.

Benefits:

- Prevents Silt and other Debris from Contaminating the Storm Sewer
- Built-in Overflow Holes Prevent Clogging, Allowing Free-flow of Water in Major Storm Event
- Easy Installation: Simply Place GutterGuard® in Front of the Curb Opening
- Helps Meet NPDES Requirements
- Made from 100% Recycled Material
- Washable
- Reusable

Applications:

- Filtration of Stormwater at Curb Inlets
- Construction Phase BMP Helps Meet NPDES Requirements

Size: 8' Length x 9" Dia. **Part Number:** 9320

Size: 10' Length x 9" Dia. **Part Number:** 9321

Size: 12' Length x 9" Dia. **Part Number:** 9322

Installation:

Install the GutterGuard® in front of the curb inlet opening. Each end of the GutterGuard® should overlap the curb inlet approximately 12”.

The GutterGuard® should be cleaned if a visual inspection shows silt and debris build up around the GutterGuard®.

The GutterGuard® is reusable. Once the construction project is complete and the GutterGuard® is no longer needed for sediment control, remove the GutterGuard®, clean and store it out of the sunlight until it is needed on the next project.

Ponding is likely if sediment is not removed regularly. Inspection of GutterGuard® should be on a regular basis and immediately after major rain events.
