

FOR IMMEDIATE RELEASE

HEADLINE: Safely store drums outdoors and avoid spill containment fines

Jacksonville, FL – April 5, 2017 - UltraTech International, Inc., leaders in the environmental compliance industry have recently added the [Ultra-Hard Top P4 Plus](#) to their innovative product line. The product as the "P4" is used to indicate is made from polyethylene and can hold up to four drums.

A seventy-five (75) gallon containment sump captures any leaks, drips or spills from drums and other containers and meets [SPCC and EPA Container Storage Regulation 40 CFR 264.175](#). The weather-proof hard topped enclosure also helps users meet Stormwater Management Regulations - NPDES, 40 CFR 122.26 (1999).

The unique, dual closure offers significant ergonomic and convenience benefits - drums are easily accessed from either side. The roll top doors offer quick and convenient access for dispensing, pumping and pouring. When complete access to the drums is necessary for loading / unloading or inspection, the lower "swing out" doors can be opened. Doors can be locked to keep contents secure.

UltraTech has a complete line of outdoor spill containment products with Hard Top Spill Pallets available for one to twenty drums.

UltraTech International, Inc. was formed in 1993 with one goal in mind: to create the world's finest offering of spill containment and spill response products. Since then, its vision has expanded into additional product categories and the company now features a product line that consists of over 350 unique products.

Focusing intensely on meeting customer needs in an innovative and cost-effective manner, the company has introduced an average of 20 new products per year. UltraTech's design and development team is credited with over 60 patents. They are industry leaders in spill containment, stormwater management, facility protection, construction compliance and oil spill response.
